

CI: Obsessions Project

Presentation 1

Structure Overview

I would like this website to be pretty simple with just a homepage, about page and archive page.

Typestyles

I have chosen Courier New as the type style for this website. This is because I feel it goes well with the idea of location tags.

H1

Courier New Regular
45 px, 50 px line height

Navigation

Courier New Regular
29 px, 31 px line height

Body

Courier New Regular
27 px, 30 px line height

Location tags

Courier New Regular
16 px, 18 px line height

This is what a link looks like

Homepage

The Home page has an image in the background which was taken by me and will be a part of the archive as well.

The Crack on the ground also represents a map. The location tags act as icons for easy navigation through the website.

About page

This page will have a short overview about the artist and the idea behind the project.

📍 About the project...

'A walk along the abstract' is a project by Gaurika Dalal who is currently a communication design student at Parsons the new school for design.

This project is an archive of all the abstract forms and textures that she saw on a walk from her house to school one morning. She is intrigued and attracted by these abstractions and therefore likes to collect such pictures. You are now welcome to take the same walk by exploring the archive section.

Archive

The archive will be filled with pictures that I've taken. Each picture will be covered with a border. Location tags will pop up when you hover over the picture.

📍about 📍archive

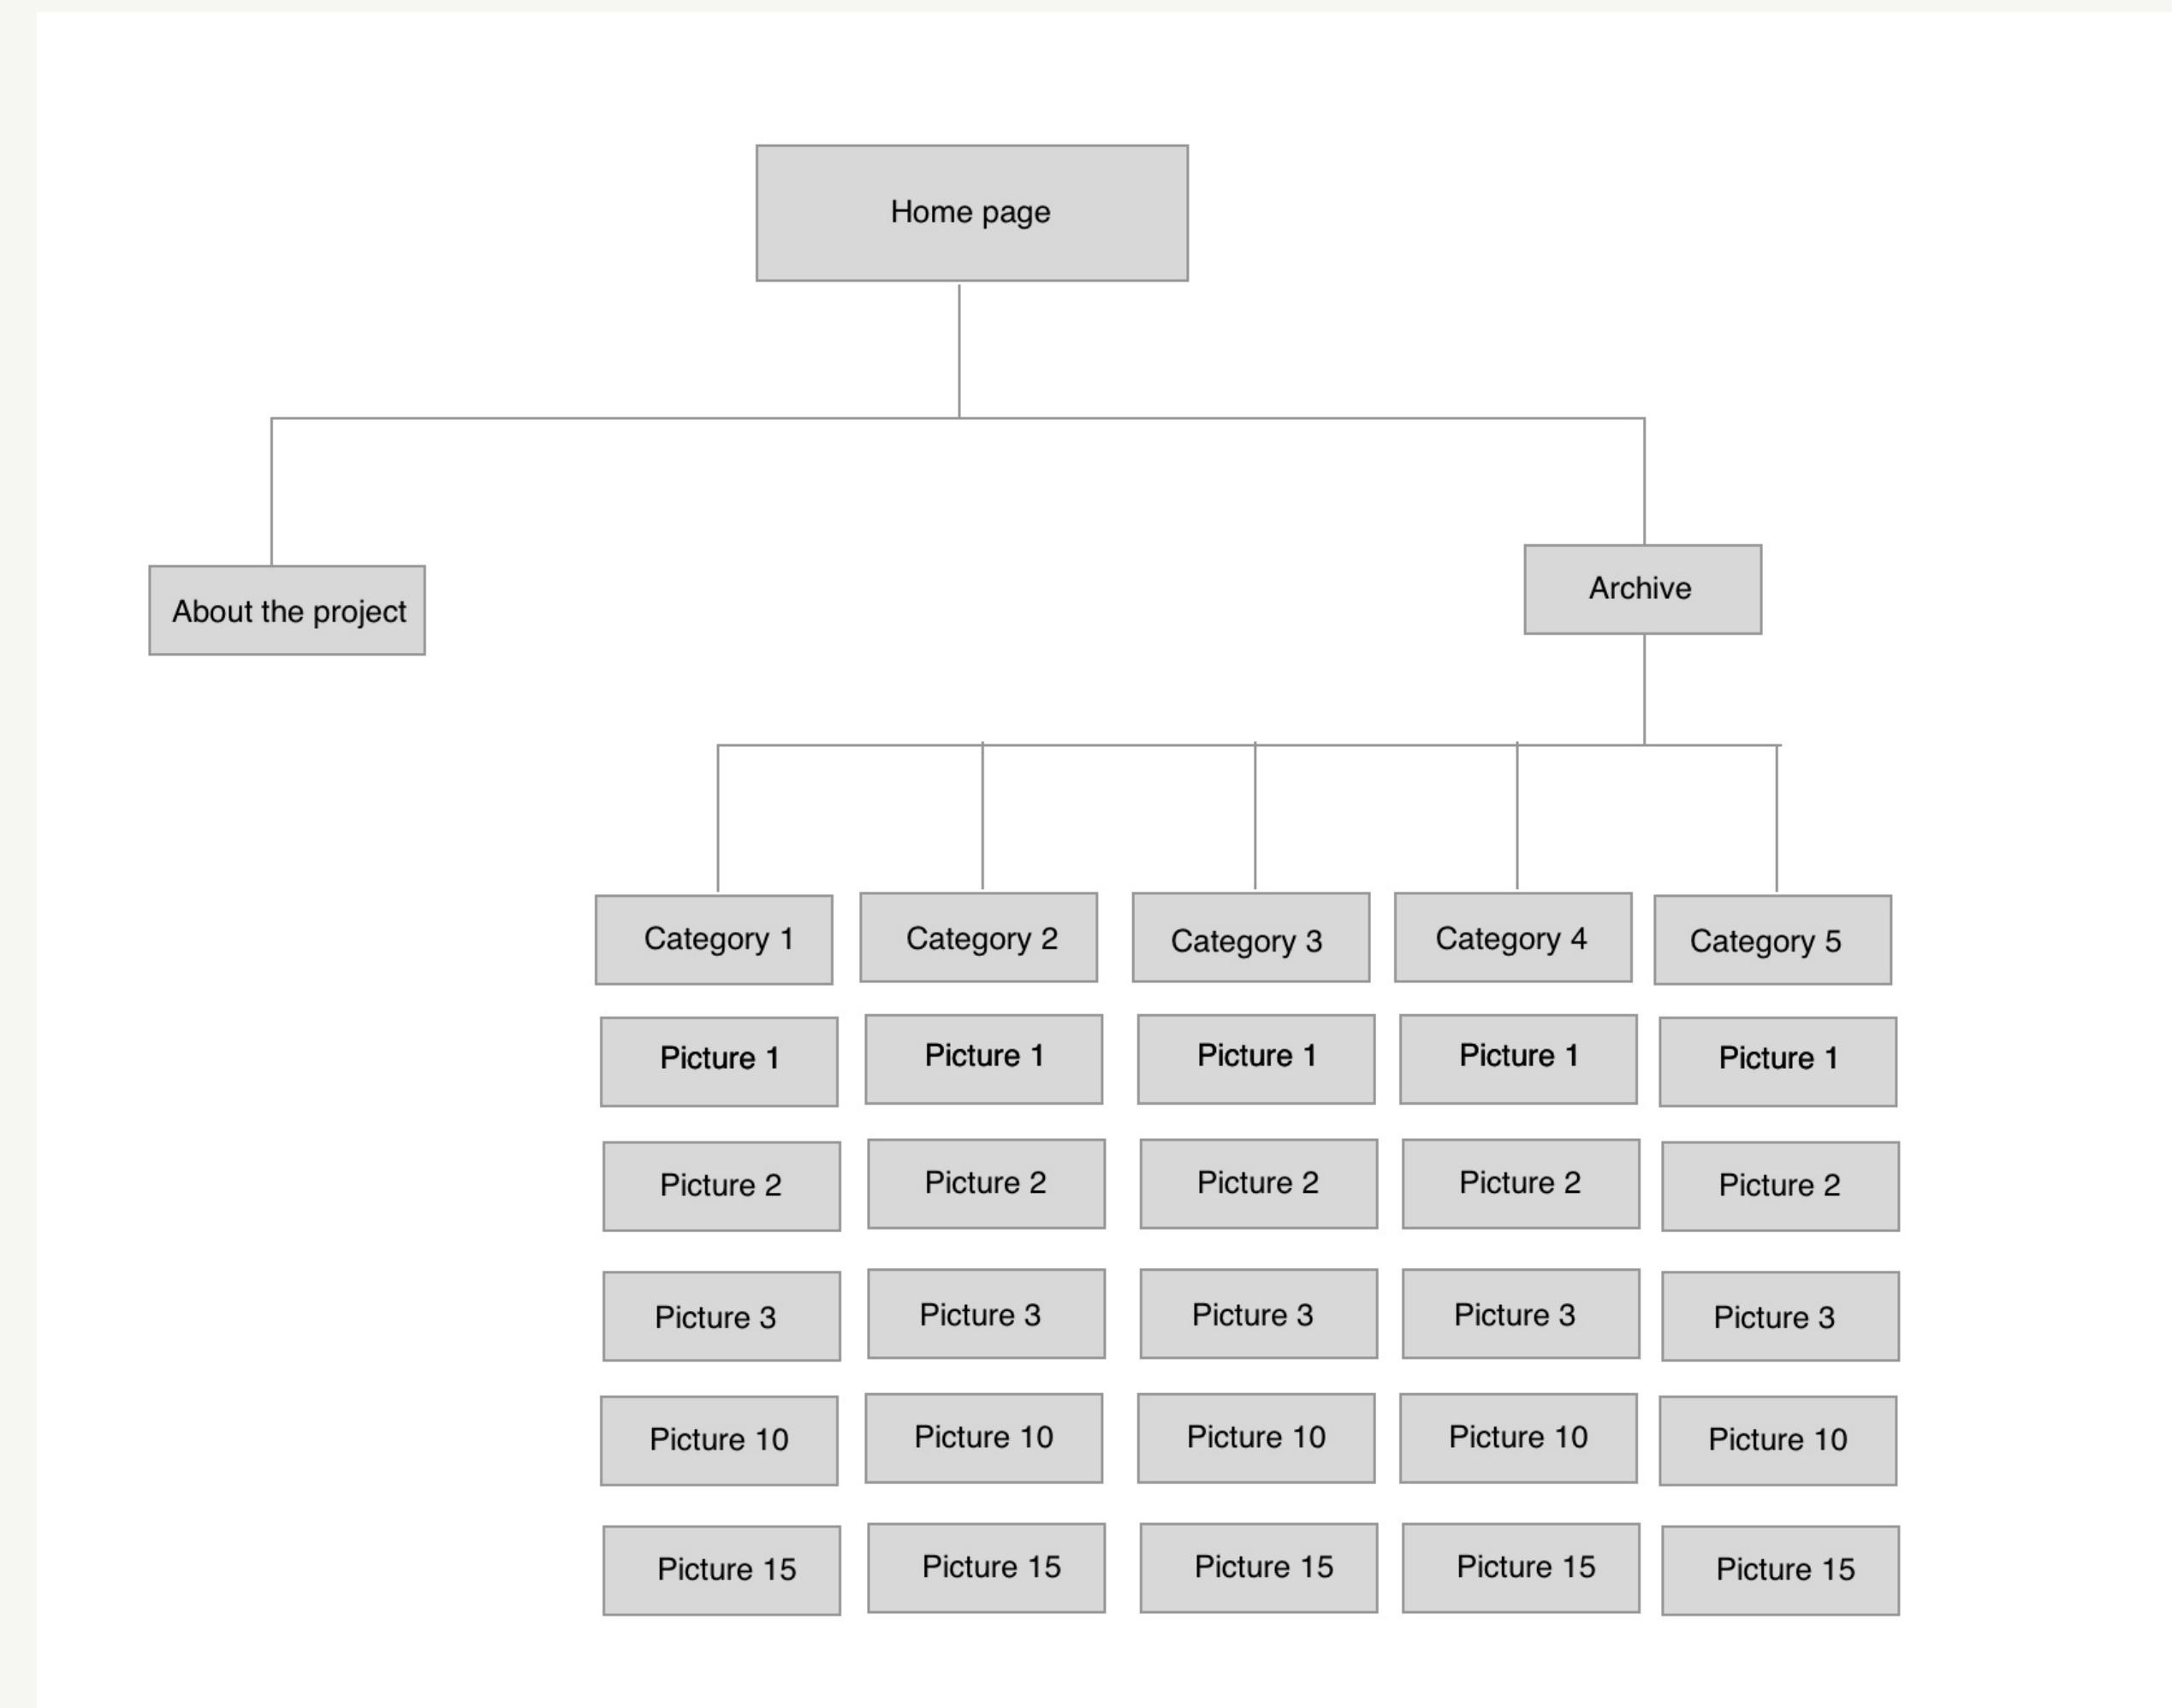

CI: Obsessions Project

Presentation 2

Structure Overview

I would like this website to have a home page linking to an about page and an archive page which will contain all the categories for the images to be placed in.

Typestyles

I have chosen Avenir as the font for this website because I

H1

Avenir Next Condensed
65 px, 68 px line height

H2

Avenir Next Condensed
50 px, 53 px line height

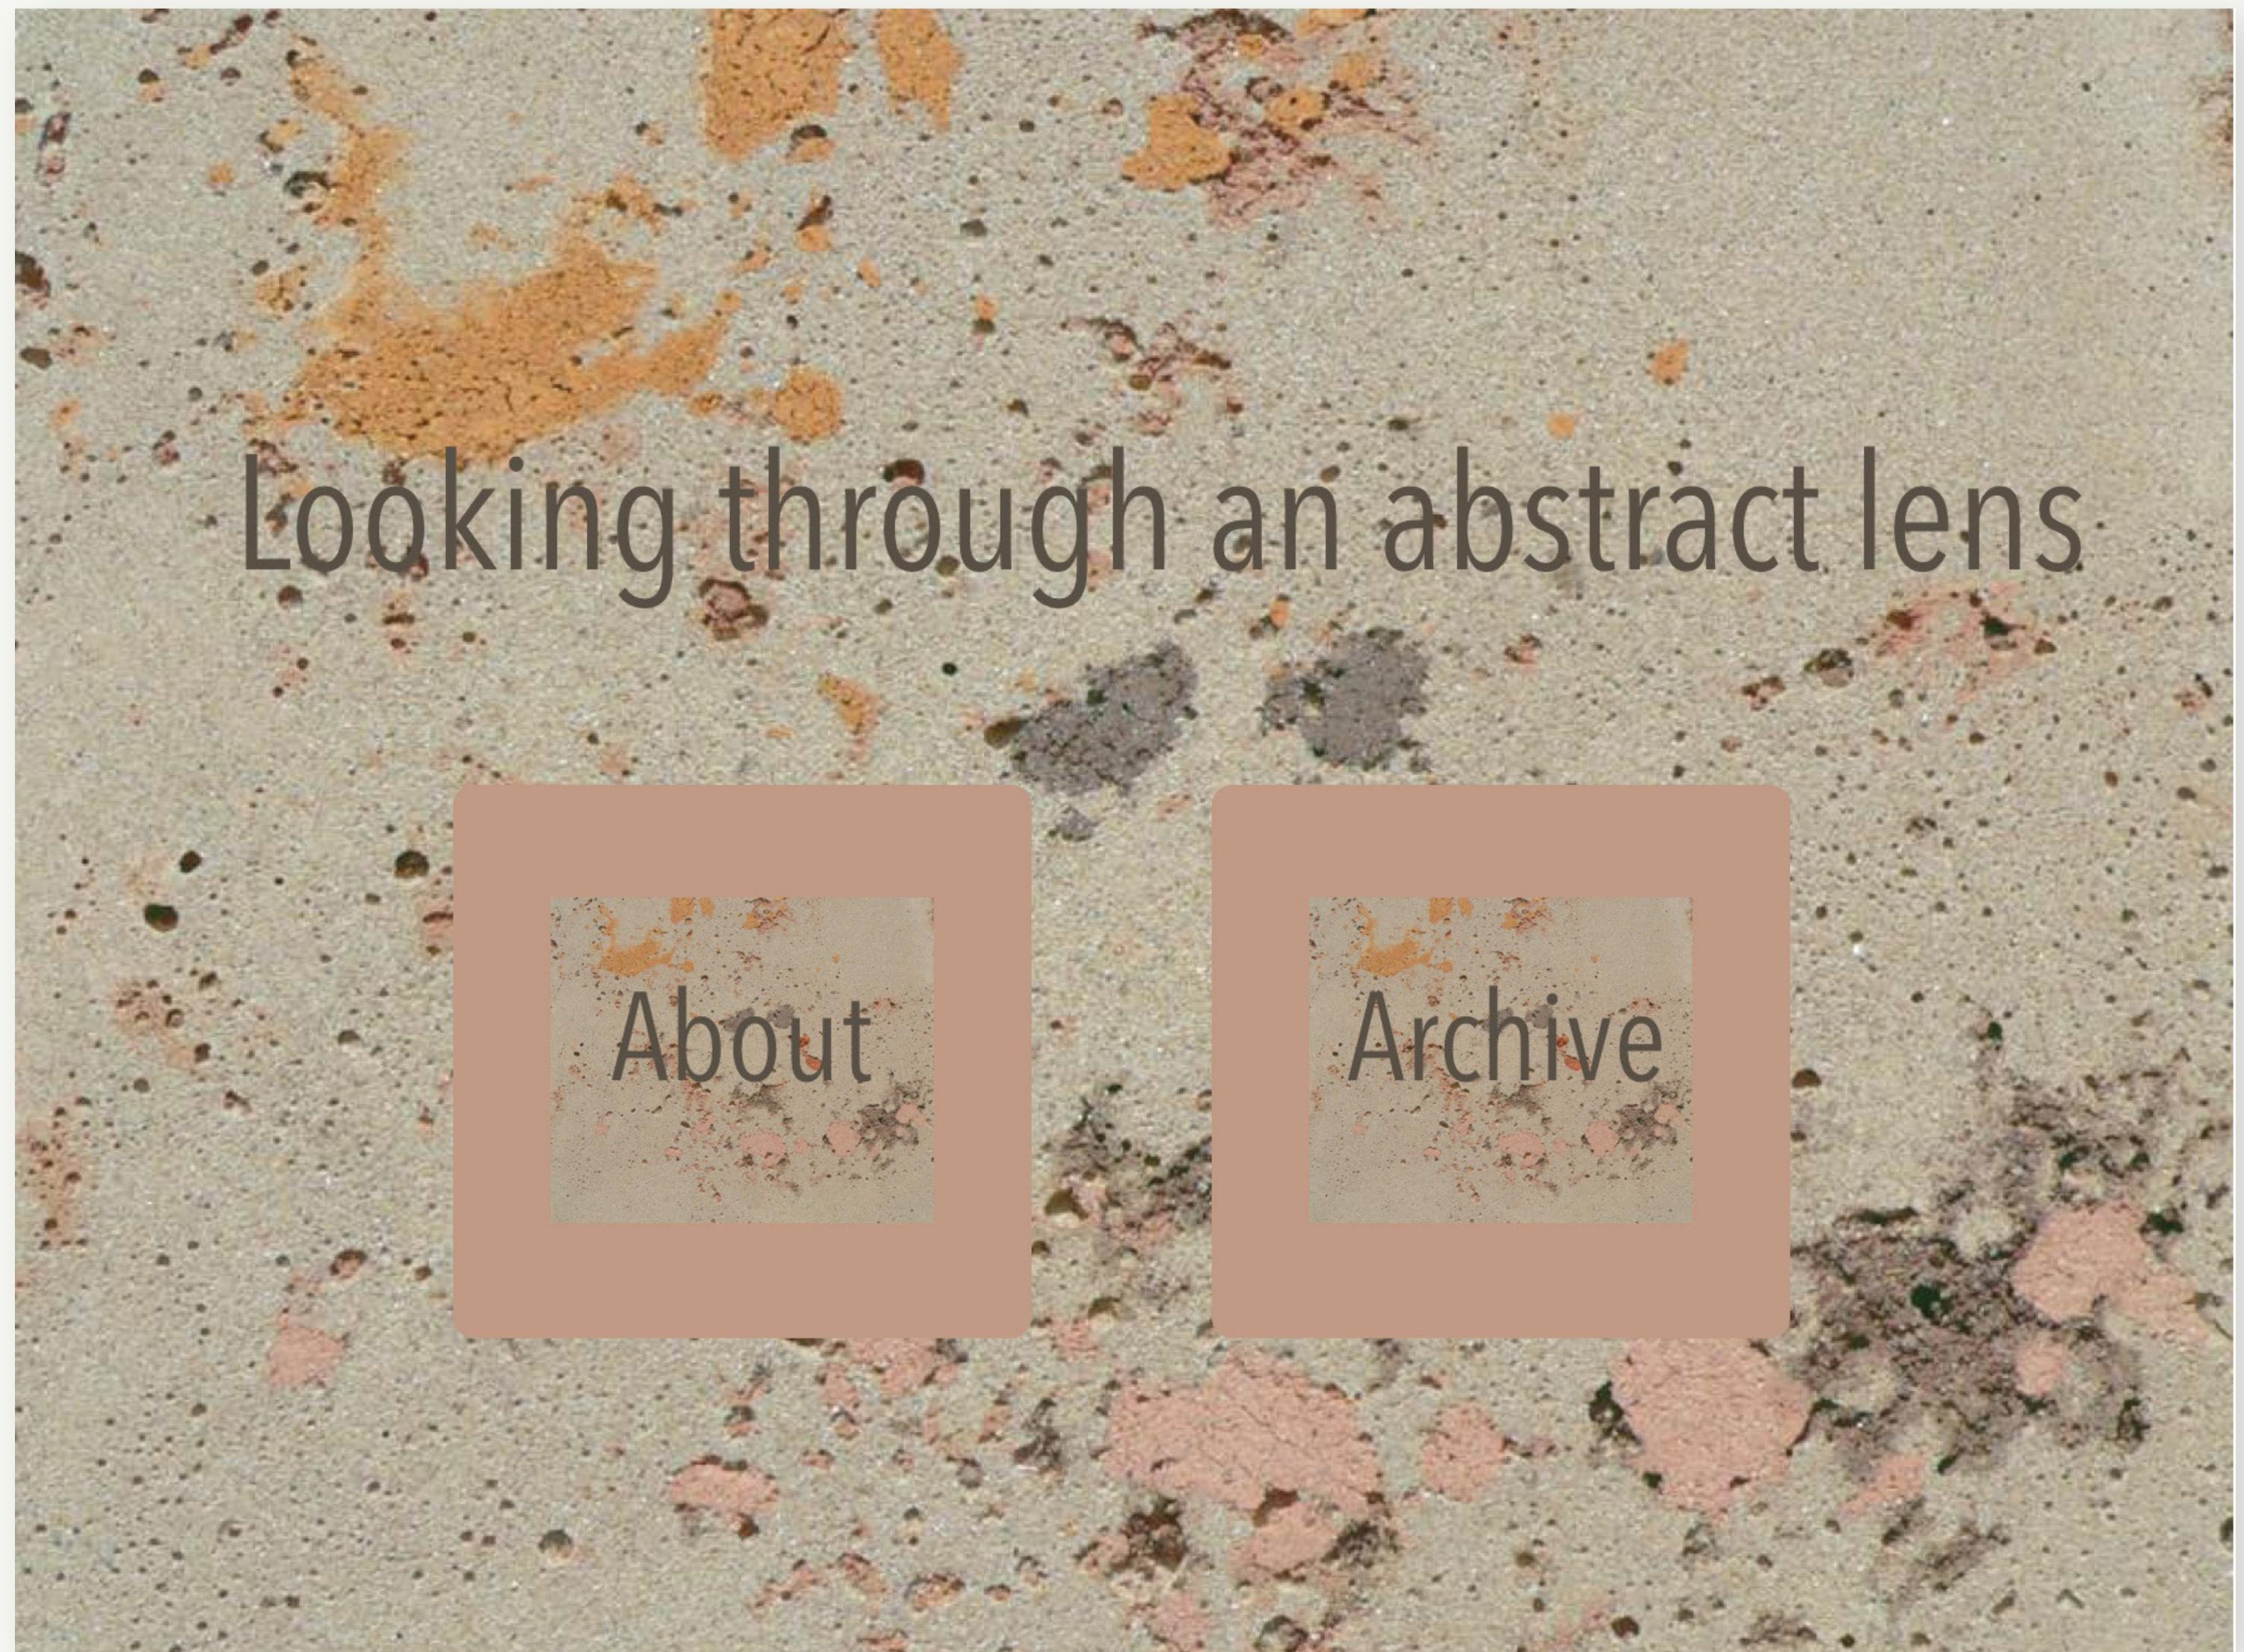

Body

Avenir Next Condensed
33 px, 35 px line height

This is what a link looks like

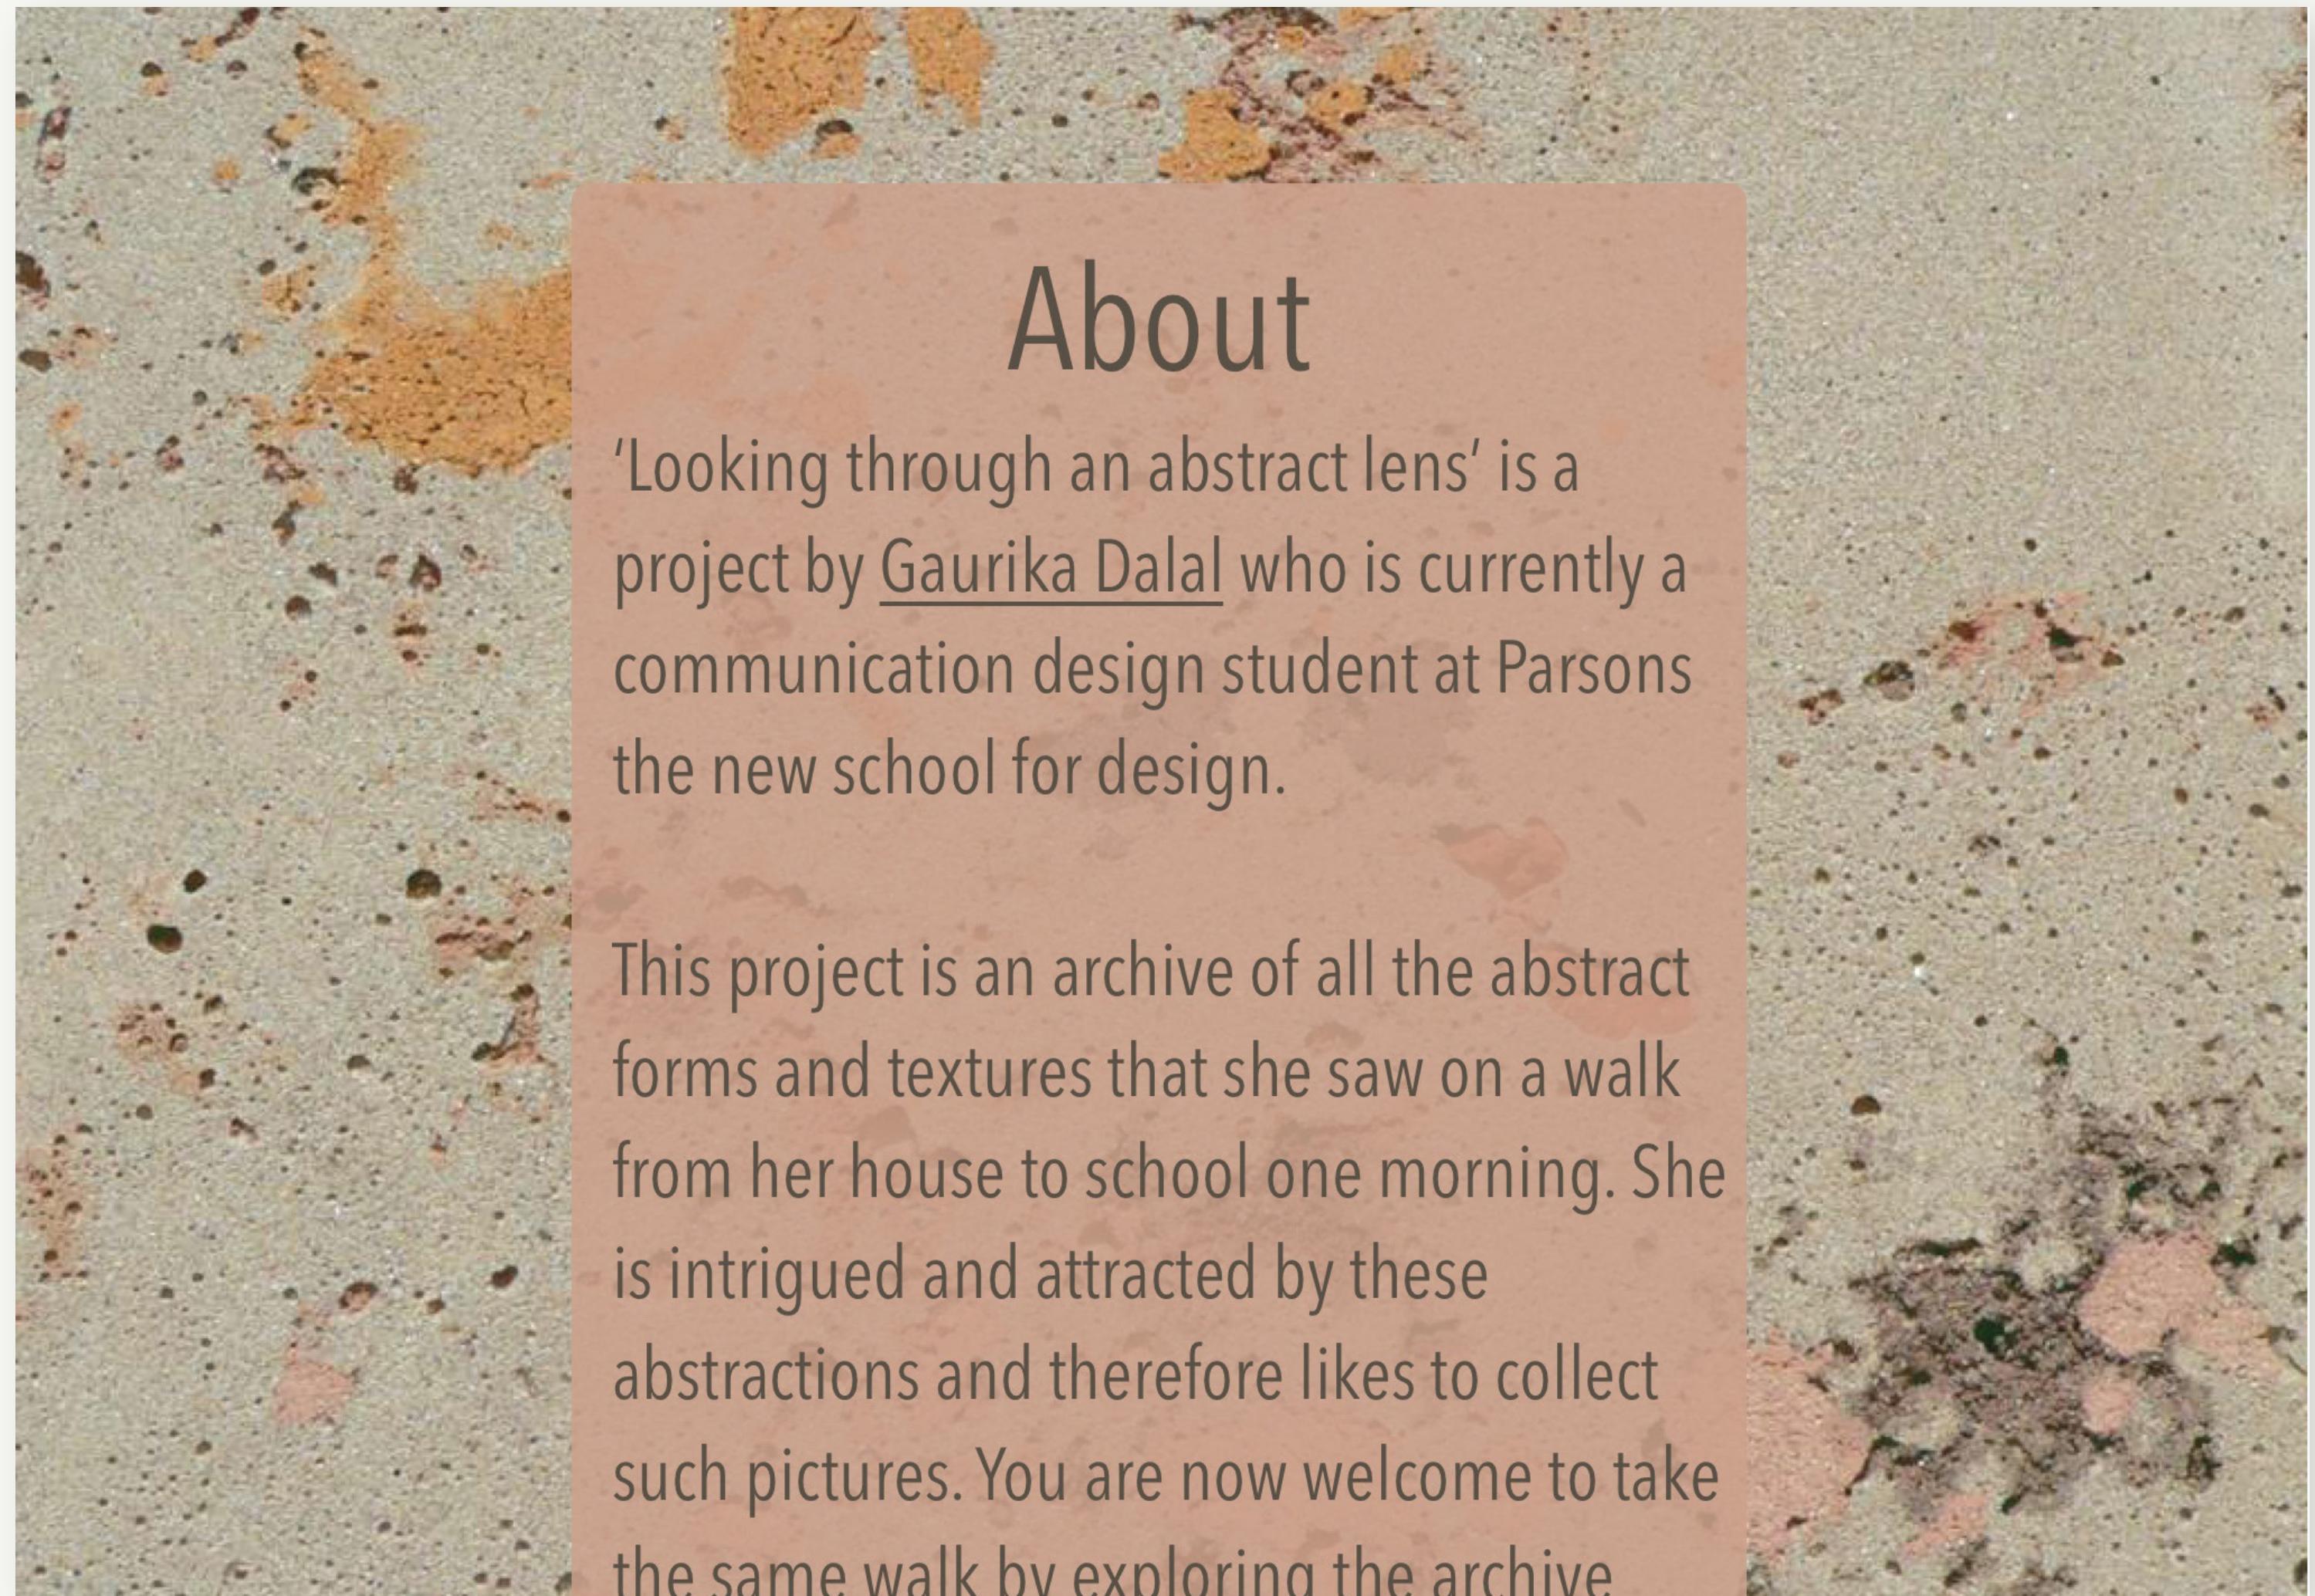

Homepage

The Home page has a faded image in the background similar to the ones that will be used in the archive. The navigation for the about and archive pages look a little like a spectacle frame and go with the idea of a lens.

About page

This page will have a short overview about the artist and the idea behind the project.

Archive

When clicked on each category it will lead you to the archive for that particular category.

[Category 1](#)

[Category 2](#)

[Category 3](#)

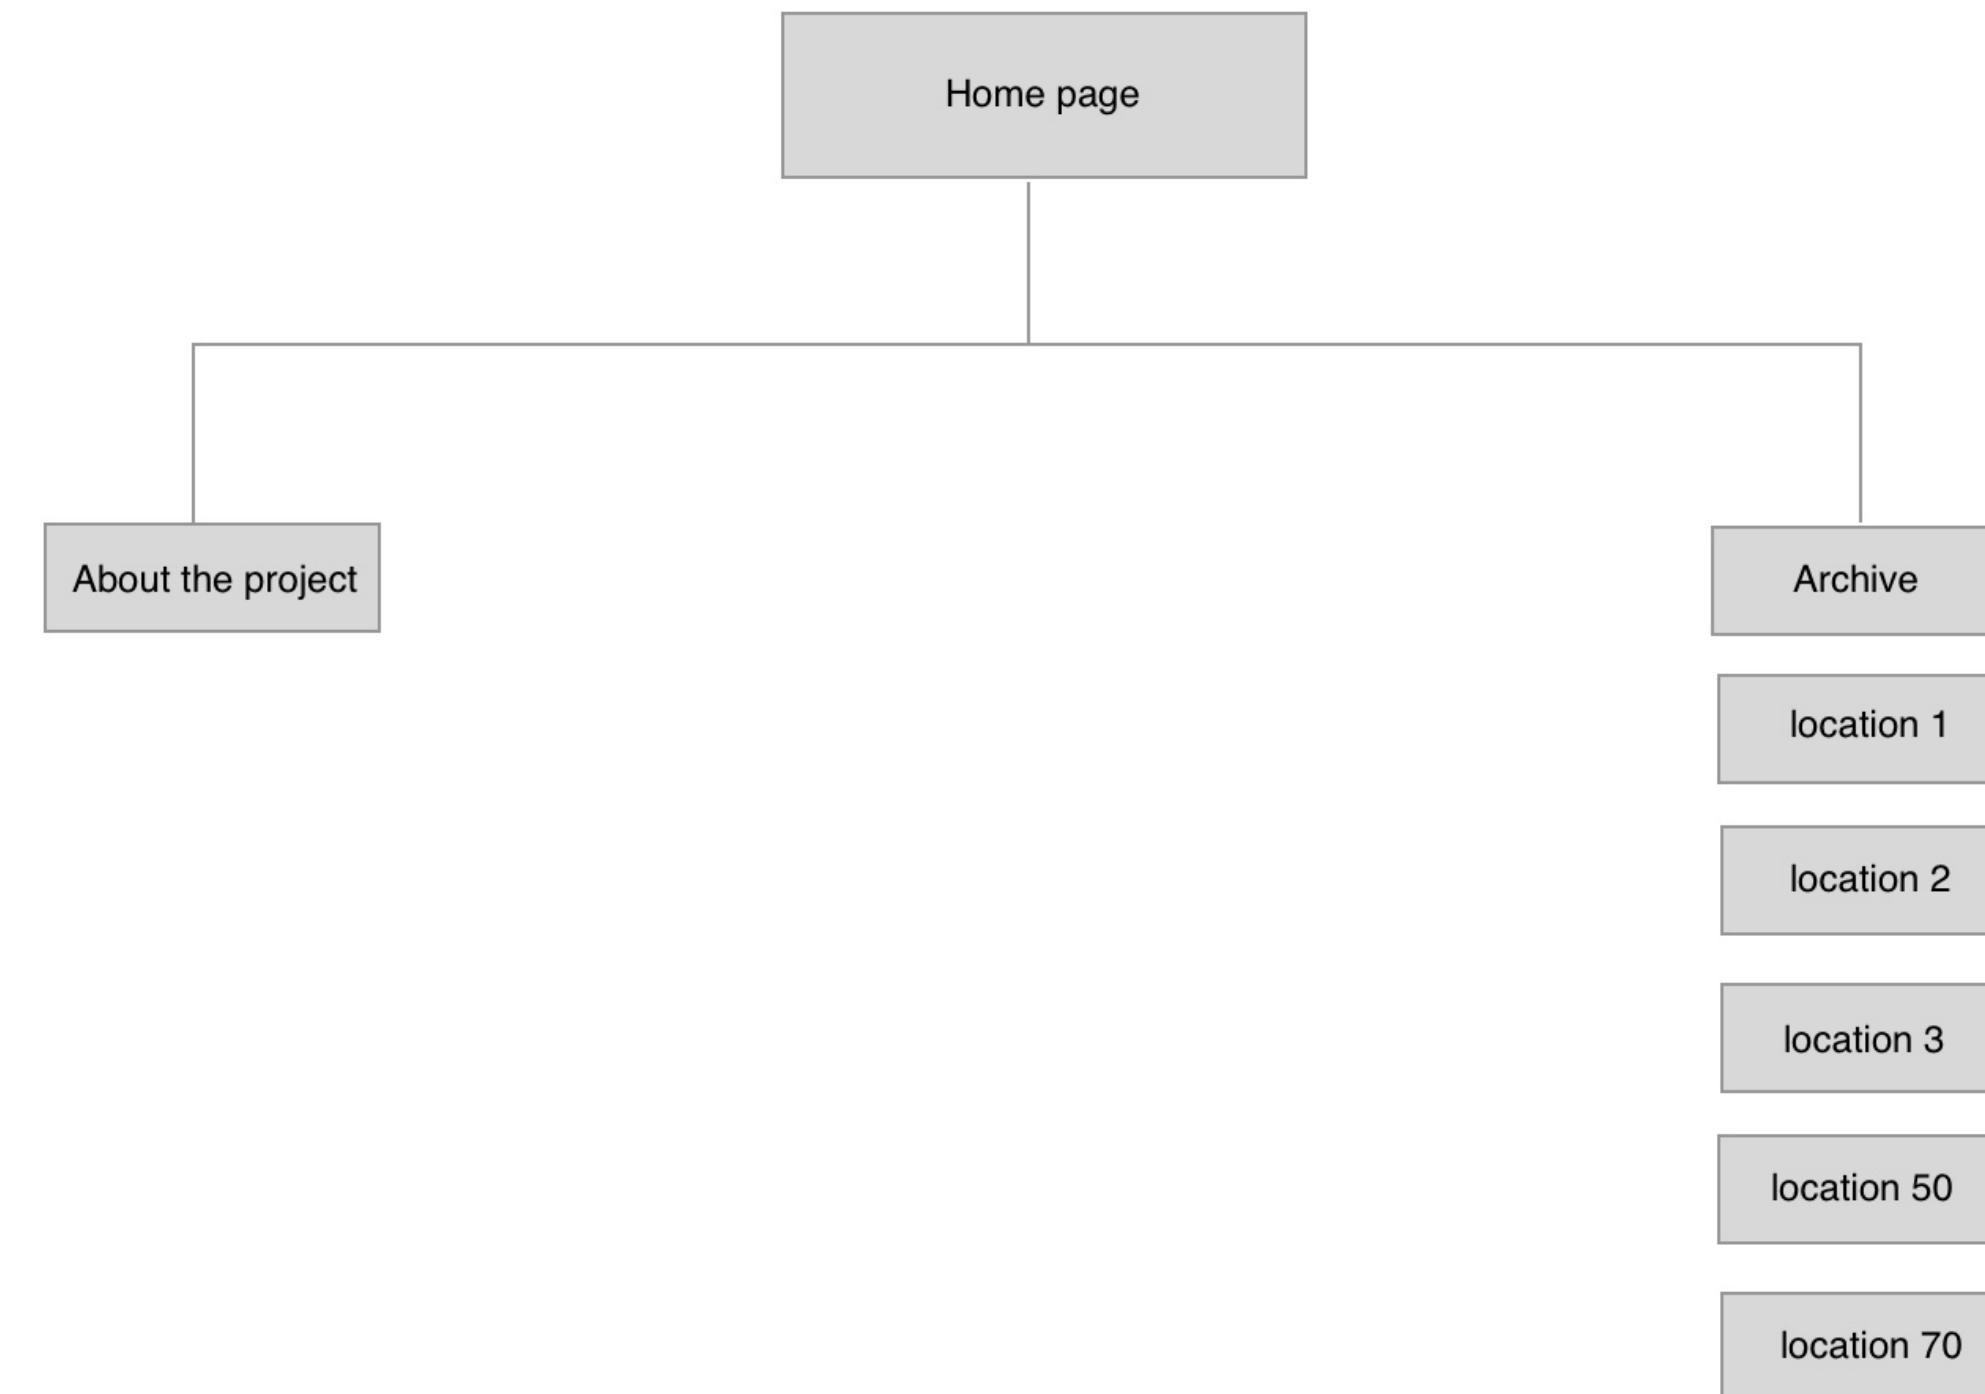

[Category 4](#)

CI: Obsessions Project

Presentation 3

Structure Overview

I would like this website to be pretty simple with just a homepage, about page and archive page. Similar to the first version expect inverting the locations and the images.

Typestyles

I have chosen Andale Mono as the type style for this website.

H1

Andale Mono

20 px, 23 px line height

H2

Andale Mono

17 px, 21 px line height

Body

Andale Mono

17 px, 21 px line height

This is what a link looks like

Homepage

The Home page has a faded image of an image of a texture that was taken by me and is similar to images that will be present in the archive. It also includes a faded image of a location tag which also looks like a shadow. Users can navigate to the other pages by clicking on the About and Archive links.

About page

This page will have a short overview about the artist and the idea behind the project.

About Archive

About

‘A walk along the abstract’ is a project by Gaurika Dalal who is currently a communication design student at Parsons the new school for design.

This project is an archive of all the abstract forms and textures that she saw on a walk from her house to school one morning. She is intrigued and attracted by these abstractions and therefore likes to collect such pictures. You are now welcome to take the same walk by exploring the archive section.

Archive

The archive will contain locations with links to the picture that was taken at that particular location.
